

Boniface Engineering Ltd is a manufacturer of specialist Recovery Vehicles for Commercial & Military vehicle application. The company also carries out installation and conversion of vehicles for the Vehicle Recovery industry

The long-term success of Boniface Engineering Ltd is reliant on the ability to continuously improve our products and services ensuring we continue to meet our customer's requirements.

Our aims are to ensure:-

1. Our products and services are provided using a management system that meets the requirements of ISO 9001:2015.
2. A framework exists to define and review Quality objectives throughout the organization.
3. Customer requirements are understood and achieved.
4. Continual review and improvement of the effectiveness of our management system.
5. Our compliance to all statutory and regulatory requirements.

It is the responsibility of the Boniface Engineering Ltd Managing Director and Senior Management to ensure this Policy is understood and implemented throughout our company.

Adherence to our management system together with high quality of work and service we provide is the responsibility of all Boniface Engineering Ltd employees.

A handwritten signature in black ink that reads "M.J. Boniface". The signature is written in a cursive, flowing style.

Michael Boniface
