The patent pending technology on the 1150R allows the boom to travel 60 inches utilizing a self cleaning roller system that requires minimal lubrication. The 1150R has been tested in harsh environments from extreme heat to heavy ice and snow with the proven ability to start and stop under heavy loads. For maximum stability, the 1150R can be ordered with the dual "H" beam outrigger system and HHU underlift.

RAPTOR PACKAGE

Raptor Remote

The patent pending Raptor Control Package is standard on the Century 1150R and optional on other rotator models. The operator can easily maneuver through operations at the unit control station or on the wireless remote. Joystick controllers operate boom and winch functions and a display screen offers a variety of information including load sensing and boom positions.
